## TRU Self-leveling, TRU Polished, TRU Gray

TRU products have been designed specifically for polishing and decorative flooring applications, elevating your project with numerous design possibilities delivered with speed, strength and durability in wet and dry conditions.

# TRU PRODUCTS

## TRU Self-Leveling

Be ready for foot traffic in only 2-3 hours and polish in 24 hours with this fast-setting, high strength, self-levelling topping material ideal for polished concrete overlays. Formulated with Rapid Set Cement, TRU is ideal for commercial and decorative architectural floors and suitable for both inside and outside use.

- Grind wet or dry and polish in 24 hours
- Polish for outstanding clarity and gloss
- Available in natural and gray colours

## TRU Gray

Customise appearance by adding decorative aggregate to this high performance, architectural topping and resurfacing material. Able to be used indoors and out, in wet and dry conditions, TRU Grey is perfect for projects needing long flow life and working time while achieving high early strength.

- Ready for foot traffic in 2 to 3 hours
- Ready for coatings in 12 hours
- Ready for grinding and polishing in 24 hours

## TRU Polished

Elevate polished concrete floors with this advanced self-levelling hydraulic cement-based topping. Suitable for use both inside and out, this crack-resistant, durable, one-component system won't deteriorate in damp conditions and is ideal for projects requiring long flow life and working time while achieving high early strength.

- Grinds and polishes well to stimulate polished concrete
- Achieves outstanding clarity and gloss
- Grind wet or dry and polish in 24 hours
